company - The Tie Bar

description - Duration: January 2017 to Till Date

Responsibility:

✓ Design and coding in a .NET server-side environment, specifically utilising the Microsoft MVC framework and the client side environment using Knockout JS.

✓ Consuming Web API and WCF Rest full services.

✓ Designed and coded application components in an agile environment utilizing a test driven development approach.

✓ Created and maintained project tasks and schedules.

✓ Provided programming estimates, identified potential problems and recommended alternative solutions.

✓ Worked in close cooperation with project managers and other functional team members to form a team effort in development.

✓ Utilized pair programming approach to ensure high quality code.

Projects:

Title: THE TIEBAR

Environment: Visual Studio 2015, MVC 5.0, C#, JavaScript, JSON, LINQ, HTML 5

Database: SQL Server 2015

Role: Developer

Description:

The Tie Bar is US based online shopping website; it is the one-stop destination for luxury menswear with premium dress shirts, ties, bow ties and more,

Title: Leave Management System

Environment: Visual Studio 2010, ASP.Net, C#.Net, JavaScript, JQuery

Database: SQL Server 2008

Role: Developer

Description:

A Leave Management System is a web application having two module one is front end and second is admin module. Admin user can manage the site content in this application. The main functionality of this web application is to maintain the employee leave policy in a company.

Title: Around Pune (CMS)

Environment: Visual Studio 2010, ASP.Net, C#.Net, JavaScript, JQuery

Database: SQL Server 2008

Role: Developer

Description:

Around Pune is a web application. In that there are two modules one is admin module and another is client or user end. Admin module controls the site data or its cms (content management system) project. The purpose of this application is to show or provide the details of all the spots and tourists places around the Pune.

Title: Country Side

Environment: Visual Studio 2008, ASP.Net, C#.Net, JavaScript, JQuery

Database: SQL Server 2008

Role: Developer

Description:

This is cms (content management system) website controlling by admin user. In that, there is one admin module to maintain website content. This site is used to provide information about tourist places, and provide offers, Different

packages for trips.

company - Hamsa Hitech Pvt. Ltd

description - Responsibility:

✓ Design and coding in a .NET server-side environment, specifically utilising the Asp.Net and C#.Net.

✓ Design and implement systems that use relational databases, specifically SQL 2008.

Project:

Title: A G JOHNSON

Environment: Visual Studio 2010, ASP.Net, C#.Net, JavaScript, JQuery,

Database: SQL Server 2008

Role: Developer

Description:

A G JOHNSON is a global employment website. The main purpose of this application is to recruit employees for clients in different countries like Switzerland, Norway and Sweden and it provide services like Organisational Development, Management and Leadership Support and Development, Legal Support

Title: CRM for Company

Environment: Visual Studio 2008, ASP.Net 3.0 using C#.Net, JavaScript, JQuery,

Database: SQL Server 2008

Role: Developer

Description:

Customer relationship management System is a web application. Which is maintaining the relation with company. We can view the Project List, Client List, Notification List, Appointment List, Conversation List, Client Person List, Company Person.

PROJECTS WORKED ON

1. Navnirman Tech Festival

√Ç~ú~ì Navnirman Tech Festival is a technical event management application that is used to scheduling and on event.

√Ç~ú~ì Technologies: ASP.NET MVC, SQL Server, Entity Framework, AJAX, JQuery

√Ç~ú~ì Role: Involved Everywhere

2. Like Security

√Ç~ú~ì The Like Security web application provides trusted services and man power as well labour management

√Ç~ú~ì Technologies: ASP.NET MVC, SQL Server, Bootstrap, AJAX, JQuery

√Ç~ú~ì Role: Involved Everywhere

3. Performance Review (In House Project)

√Ç-ú-ì This is an In-House Web application which is used to fill the review for particular Employee by other employees who worked with him. This application is very useful to take decision in appraisal of employee. All the submitted review can be downloaded in PDF format as per selection.

√Ç-ú-ì Technologies: ASP.NET MVC, Entity Framework, SQL Server, AJAX, JQuery

Role and Responsibilities: √-Ä-ç Worked in Development of Back-end Like Data Collections. √-Ä-ç Database Schema Designing, and Create Database Dictionary & Made Database Constraints. √-Ä-ç I was also worked on Front-end Designing like Screen Generations, form Designing & Applying client side Validation. √-Ä-ç SRS documentation and Development.

5. Project Name: School Management System (SMS) Project Description: School Management System is complete school management software designed to automate a school's diverse operations from classes, exams to school events calendar. This school software has a powerful online community to bring parents, teachers and student on a common interactive platform. It is paperless office automation solution for modern schools. The School Management System provides the facility to carry out all day to day activities of the school, making them fast, easy, efficient and accurate.

Environment: Presentation Layer: HTML, CSS, JavaScript Business Layer: .NET Framework 4.5, ASP.Net MVC5 Database Layer: SQL Server 2012 Operating System: Windows 7 Features: √-Ä-ç Project includes the feature of testing type and the activity on the project activities. √-Ä-ç Project includes the online management and test process. Role and Responsibilities: √-Ä-ç Worked in Development of Back-end Like Data Collections. √-Ä-ç Database Schema Designing, and Create Database Dictionary & Made Database Constraints. √-Ä-ç I was also worked on Front-end Designing like Screen Generations, form Designing & Applying client side Validation. √-Ä-ç SRS documentation and Development.

6. Project Name: CREDIT MONITORING application Using the CREDIT MONITORING application, RMs, UHs, Credit Controllers and CMUs are able to monitor and manage the following items online, update the regularization dates and add their comments as well as generate reports: - Overdrafts - Past Dues - SBLC / FG Expiry - Mortgage Expiry - Cheques Returns & Failed Direct Debit - CB Classification Relationship Manager The relationship manager can only update the Regularization Date and Comments. All other fields will be disabled (greyed-out) for the relationship manager. On updating the Regularization Date and the RM Comments, a successful message will be displayed to the RM and then the RM will be navigated to the Dashboard screen again.

Credit Controller (CCU) The credit controller can only update the CCU Comments only if the Regularization Date and RM Comments are present. Otherwise, the CCU Comments field will be disabled (greyed-out) . All other fields will also be disabled (greyed-out) for the CCU. On updating the CCU Comments, a successful message will be displayed to the CCU and then the CCU will be navigated to the Dashboard screen.

The CMU can only update the CMU comments, if and only if the CCU Comments are present. Otherwise, the CMU Comments field should be disabled (greyed-out) . All other fields will be disabled (greyed-out) for the CMU. On updating the CMU Comments, a successful message will be displayed to the CMU and then the CMU will be navigated to the Dashboard screen.

UH The UH can only update the UH comments All other fields will be disabled (greyed-out) for the UH. On updating the UH Comments, a successful message will be displayed to the UH and then the UH will be navigated to the Dashboard screen.

Environment: Presentation Layer: HTML, CSS, JavaScript, JQuery Business Layer: .NET Framework 4.5, ASP.Net MVC5 Database Layer: SQL Server 2012 Operating System: Windows 7 Role and Responsibilities: √-Ä-ç Understanding requirements, Coding and unit testing. √-Ä-ç SRS documentation and Development.

company - The Tie Bar

description - Duration: January 2017 to Till Date

Responsibility:

√Ç~Ä~Ç Design and coding in a .NET server-side environment, specifically utilising the Microsoft MVC framework and client side environment using Knockout JS.

√Ç~Ä~Ç Consuming Web API and WCF Rest full services.

√Ç~Ä~Ç Designed and coded application components in an agile environment utilizing a test driven development approach.

√Ç~Ä~Ç Created and maintained project tasks and schedules.

√Ç~Ä~Ç Provided programming estimates, identified potential problems and recommended alternative solutions.

√Ç~Ä~Ç Worked in close cooperation with project managers and other functional team members to form a team effort in development.

Utilized pair programming approach to ensure high quality code.

Projects:

Title: THE TIEBAR

Environment: Visual Studio 2015, MVC 5.0, C#, JavaScript, JSON, LINQ, HTML 5

Database: SQL Server 2015

Role: Developer

Description:

The Tie Bar is US based online shopping website; it is the one-stop destination for luxury menswear with premium dress shirts, ties, bow ties and more,

Title: Leave Management System

Environment: Visual Studio 2010, ASP.Net, C#.Net, JavaScript, JQuery

Database: SQL Server 2008

Role: Developer

Description:

A Leave Management System is a web application having two module one is front end and second is admin module. Admin user can manage the site content in this application. The main functionality of this web application is to maintain and manage the employee leave policy in a company.

Title: Around Pune (CMS)

Environment: Visual Studio 2010, ASP.Net, C#.Net, JavaScript, JQuery

Database: SQL Server 2008

Role: Developer

Description:

Around Pune is a web application. In that there are two modules one is admin module and another is client or end. Admin module controls the site data or its cms (content management system) project. The purpose of the project is to show or provide the details of all the spots and tourists places around the Pune.

Title: Country Side

Environment: Visual Studio 2008, ASP.Net, C#.Net, JavaScript, JQuery

Database: SQL Server 2008

Role: Developer

Description:

This is cms (content management system) website controlling by admin user. In that, there is one admin module to maintain website content. This site is used to provide information about tourist places, and provide offers, Different packages for trips.

company - Hamsa Hitech Pvt. Ltd

description - Responsibility:

✓ Design and coding in a .NET server-side environment, specifically utilising the Asp.Net and C#.Net.

✓ Design and implement systems that use relational databases, specifically SQL 2008.

Project:

Title: A G JOHNSON

Environment: Visual Studio 2010, ASP.Net, C#.Net, JavaScript, JQuery,

Database: SQL Server 2008

Role: Developer

Description:

A G JOHNSON is a global employment website. The main purpose of this application is to recruit employees for clients in different countries like Switzerland, Norway and Sweden and it provide services like Organisational Development, Management and Leadership Support and Development, Legal Support

Title: CRM for Company

Environment: Visual Studio 2008, ASP.Net 3.0 using C#.Net, JavaScript, JQuery,

Database: SQL Server 2008

Role: Developer

Description:

Customer relationship management System is a web application. Which is maintaining the relation with company. We can view the Project List, Client List, Notification List, Appointment List, Conversation List, Client Person List, Company Person.

Technical Skills CATEGORY SKILLS Language C, C#, OOP, Dot Net Technologies ASP.Net MVC, ADO.Net, Entity Framework, LINQ Web Technologies HTML, CSS Browser Scripting JavaScript, JQuery, Ajax, JSON Web Browser Explorer 8.0, Mozilla Firefox10 Front-end-framework Bootstrap, Kendo UI Database SQL Server 2012 Development Tools Visual Studio 2013 Operating Systems MS Window 2007 Project Details Projects Worked On: 1. Project Name: Politician Website Role: Trainee Project Description: I developed Politician website. In this website there is Home Page, Quick Facts, Category, Biography, Gallery, and ContactUs Page. It is a totally dynamic website. Environment: Operating System: Windows 7 Development Tools: Visual Studio 2013 Database Server: SQL Server 2012 Technology: .NET Framework 4.5, ASP.Net MVC5 Presentation Layer: HTML, CSS, JQuery, Bootstrap Role and Responsibilities: ✓ Understanding requirements, Coding and unit testing. 2. Project Name: Coaching Management System Project Description: This software is helps to manage institute (Student, Teacher, Courses, Batches, Fees, Attendance and Marks) . Provide easy reports like outstanding Fees, Marks, and Attendance etc. This software is specially designed for coaching institute. Environment: Operating System: Windows 7 Database Server: SQL Server 2012 Technology: .NET Framework 4.5, ASP.Net MVC5 Presentation Layer: HTML, CSS, JavaScript, JQuery, Bootstrap Features: ✓ Project includes the feature of testing type and the activity on the project activities. ✓ includes the online management and test process. Role and Responsibilities: ✓ Worked in Development end Like Data Collections. ✓ Database Schema Designing, and Create Database Dictionary & Made Database Constraints. ✓ I was also worked on Front-end Designing like Screen Generations, form Designing & Application client side Validation. ✓ SRS documentation and Development. 3. Project Name: Hospital Management System

(HMS) Project Description: Hospital Management System is powerful, flexible, and easy to use and designed and developed to deliver real conceivable benefits to hospitals and clinics and more importantly it is backed by reliable and dependable. Hospital Management System is designed for multispecialty hospitals, to cover a wide range of hospital administration and management processes. It is an integrated end-to-end Hospital Management System that provides relevant information across the hospital to support effective decision making for patient care, hospital administration and critical financial accounting, in a seamless flow. Environment: Presentation Layer: HTML, CSS, JavaScript, JQuery, Kendo UI Business Layer: .NET Framework 4.5, ASP.Net MVC5 Database Layer: SQL Server 2012 Operating System: Windows 7 Features: ✓-✓-✓ Project includes the feature of testing type and the activity on the project activities. ✓-✓-✓ Project includes the online management and test process. Role and Responsibilities: ✓-✓-✓ Worked in Development of Back-end Like Data Collections. ✓-✓-✓ Database Schema Designing, and Create Database Dictionary & Made Database Constraints. ✓-✓-✓ I was also worked on Front-end Designing like Screen Generation, form Designing & Applying client side Validation. ✓-✓-✓ SRS documentation and Development.

4. Project Name: Ticket Booking Software (BESS) Project Description: Online Ticket Booking System is a Web based application that allows users to directly book the ticket by this application. This application is implemented for Bus, Tour and Travel Agency. Environment: Presentation Layer: HTML, CSS, JavaScript, JQuery, KendoUI Business Layer: .NET Framework 4.5 ASP.Net MVC5 Database Layer: SQL Server 2012 Operating System: Windows 7 Features: ✓-✓-✓ Project includes the feature of testing type and the activity on the project activities. ✓-✓-✓ Project includes the online management and test process. Role and Responsibilities: ✓-✓-✓ Worked in Development of Back-end Like Data Collections. ✓-✓-✓ Database Schema Designing, and Create Database Dictionary & Made Database Constraints. ✓-✓-✓ I was also worked on Front-end Designing like Screen Generations, form Designing & Applying client side Validation. ✓-✓-✓ SRS documentation and Development.

5. Project Name: School Management System (SMS) Project Description: School Management System is complete school management software designed to automate a school's diverse operations from classes, exams to school events calendar. This school software has a powerful online community to bring parents, teachers and student on a common interactive platform. It is paperless office automation solution for modern schools. The School Management System provides the facility to carry out all day to day activities of the school, making them fast, easy, efficient and accurate. Environment: Presentation Layer: HTML, CSS, JavaScript Business Layer: .NET Framework 4.5, ASP.Net MVC5 Database Layer: SQL Server 2012 Operating System: Windows 7 Features: ✓-✓-✓ Project includes the feature of testing type and the activity on the project activities. ✓-✓-✓ Project includes the online management and test process. Role and Responsibilities: ✓-✓-✓ Worked in Development of Back-end Like Data Collections. ✓-✓-✓ Database Schema Designing, and Create Database Dictionary & Made Database Constraints. ✓-✓-✓ I was also worked on Front-end Designing like Screen Generations, form Designing & Applying client side Validation. ✓-✓-✓ SRS documentation and Development.

6. Project Name: CREDIT MONITORING application Using the CREDIT MONITORING application, RMs, UHs, Credit Controllers and CMUs are able to monitor and manage the following items online, update the regularization dates and add their comments as well as generate reports: - Overdrafts - Past Dues - SBLC / FG Expiry - Mortgage Expiry - Cheques Returns & Failed Direct Debit - CB Classification Relationship Manager The relationship manager can only update the Regularization Date and Comments. All other fields will be disabled (greyed-out) for the relationship manager. On updating the Regularization Date and the RM Comments, a successful message will be displayed to the RM and then the RM will be navigated to the Dashboard screen again. Credit Controller (CCU) The credit controller can only update the CCU Comments only if the Regularization Date and RM Comments are present. Otherwise, the CCU Comments field will be disabled (greyed-out) . All other fields will also be disabled (greyed-out) for the CCU. On updating the CCU Comments, a successful message will be displayed to the CCU and then the CCU will be navigated to the Dashboard screen. The CMU can only update the CMU comments, if and only if the CCU Comments are present. Otherwise, the CMU Comments field should be disabled (greyed-out) . All other fields will be disabled (greyed-out) for the CMU. On

updating the CMU Comments, a successful message will be displayed to the CMU and then the CMU will be navigated to the Dashboard screen. UH The UH can only update the UH comments All other fields will be disabled (greyed out) for the UH. On updating the UH Comments, a successful message will be displayed to the UH and then the UH will be navigated to the Dashboard screen. Environment: Presentation Layer: HTML, CSS, JavaScript, JQuery Business Logic Layer: .NET Framework 4.5, ASP.Net MVC5 Database Layer: SQL Server 2012 Operating System: Windows 7 Role and Responsibilities: ✓ Understanding requirements, Coding and unit testing. ✓ SRS documentation and testing.
